

BitDefender Security for EXCHANGE

Comprehensive protection for Exchange Servers

BitDefender Security for Exchange provides antivirus and anti-spam* engines seamlessly integrated with the MS Exchange 2003, 2000 and 5.5 servers, creating a completely clean Exchange environment. Due to the VSAPI technology, BitDefender Security for Exchange

Key benefits:

- Increased productivity;
- Reduced mail traffic;
- Increased mail security based on product's excellent response time;
- Ease of use.

Key features:

- Certified antivirus engines;
- Multiple layers of anti-spam* filtering;
- Self-adjusting antivirus activity preventing server overload;
- Intuitive product interface;
- Centralized management software compatibility.

BitDefender advanced technologies:

b-have At the core of all BitDefender products is B-HAVE (Behavioral Heuristic Analyzer in Virtual Environments). In addition to traditional signature detection and content-based heuristic methods, B-HAVE implements behavior-based heuristics. By emulating a virtual computer-inside-a-computer where pieces of software are run and checked for potential malicious behavior, B-HAVE virtually eliminates false positives and significantly increases detection rates for new and unknown malware. This proprietary BitDefender technology represents a new security layer that keeps the operating system safe from unknown viruses by detecting malicious pieces of code for which signatures have not yet been released.

BitDefender Antivirus engines

BitDefender Antivirus scan engines are certified by ICSA Labs, Virus Bulletin and Checkmark.

Core Functionalities

5_bV^f~aXVgXW@XffTZXF~

Filters and blocks messages if the attachment or message body includes a virus, Trojan, backdoor or other potentially dangerous active codes. It blocks infected files regardless of the archive or compression type.

FVTaa'aZ TgGefafcbeg?Xi Xtt

VSAPI-based scanning at transport level prevents infected messages from entering the Exchange organization. Messages that pass through a gateway Exchange 2003 server and which would not normally enter the Exchange store are scanned in this way.

BhgJbhaWFVtaa'aZt

This type of scanning is performed on all outbound messages, before they are sent.

Bcg\ nXWVta'aZ

The scanning of multiple recipient e-mails is done only once, before delivery, instead of being repeated for each separate recipient.

CdbgXVgba~Ybe'AXj ~@T_UbkXf

Real-time antivirus protection is provided for newly created mail boxes.

FXYZTV\hfgaZ~4agi \hf~4Vgi y

Prevents e-mail server overload or speed loss in data transmission as the antivirus activity self-adjusts according to the system processes of the e-mail server.

CobTVgi X'FVtaa'aZ

New e-mail messages are scanned upon being submitted to the Exchange server, even before they are actually accessed, unless higher priority e-mail messages are being scanned at the time.

4agfCT ~; XhefgW4aT_l fV~GXV[ab_bZI t

The heuristic filter performs a set of tests on all message components, (i.e. not only the header, but also the message body in either HTML or text format), looking for words, phrases or links which are common to spam.

J 5?~fj [yk~?fg~5_TV^_fgf fhccbeg

The administrator can set a list of trusted/untrusted addresses based on the following format: "cb'k \jW' hc' fYgdYVWj Yml Uk Ung UWWdfi 'cfí Uk Ung fY'YVfi 'a Uj"

Increased Usability

EX bgX@TaTZX Xag

Server protection can be remotely configured by simply installing the management console on one computer inside the network.

6XagT_nXW@TaTZX Xag

BitDefender Security for Exchange is compatible with BitDefender Enterprise Manager, allowing organizations to centrally manage antivirus protection and security policies inside complex networks.

Services

agX_YXagFZaTgheX'HcWTgX

Virus definitions are automatically updated without user intervention, directly from the BitDefender servers or from approved mirror sites, ensuring a swift and effective reaction.

HcWTgX'Chf [vaZt

BitDefender Security for Exchange can be configured to initiate an i dXUHY i dcb fYW]dhcZU'gdYVWU'mWUZYX'í i dXUHY Ubbci bW'a Ybf message from BitDefender Lab (subscription service).

HcZaTVWf

Registered users benefit from free upgrades to any new version of the product during the license period. Special price offers are also available to returning customers.

9eX% "*" ~CbYXff'baT_GXV[aWT_F hccbeg

Certified representatives provide BitDefender business customers with free permanent support online, by telephone or e-mail. The professional technical support is supplemented by an online database with answers to Frequently Asked Questions and fixes for common issues.

* only available for MS Exchange 2000/2003 Server

** only available for MS Exchange 2003 Server
