

BitDefender Security for SHAREPOINT

The Right Solution for your SharePoint Server

BitDefender Security for SharePoint provides antivirus protection for your SharePoint Server. BitDefender Security for SharePoint scans

Key benefits:

- Increased productivity;
- Safe sharing of information and team collaboration;
- Increased file security based on product's excellent response time;
- Ease of use.

Key features:

- Integration with VSAPI to optimize and accelerate the scanning process;
- Real-time and on demand scanner for permanent file protection;
- Comprehensive reporting on scanned files and alerts;
- Intuitive product interface;
- Centralized management software compatibility.

BitDefender advanced technologies:

At the core of all BitDefender products is B-HAVE (Behavioral Heuristic Analyzer in Virtual Environments). In addition to traditional signature detection and content-based heuristic methods, B-HAVE implements behavior-based heuristics. By emulating a virtual computer-inside-a-computer where pieces of software are run and checked for potential malicious behavior, B-HAVE virtually eliminates false positives and significantly increases detection rates for new and unknown malware. This proprietary BitDefender technology represents a new security layer that keeps the operating system safe from unknown viruses by detecting malicious pieces of code for which signatures have not yet been released.

BitDefender Advanced Technology

BitDefender Advanced Technology has been recognized by leading certification bodies to provide the most proactive antivirus protection available. The BitDefender Antivirus scan engines are certified by ICSA Labs, Virus Bulletin and Checkmark.
